CONSTRUCTING EXCELLENCE

ONLINE SELF ASSESSMENT FOR CDM

CCG have produced a free Self Assessment Tool that helps businesses and organisations manage their construction projects safely by assessing their compliance with the CDM2007 regulations. The tool gives guidance, provides benchmarking and summarises strengths and areas for development.

CCG and BPF research on CDM

CCG and the BPF are sponsoring research amongst businesses and organisations to discover levels of understanding and the impact of the CDM2007 Regulations. The research will be used during the evaluation of the regulatory package to suggest improvements if required.

An interim research report is due in the first quarter of 2009.

Details can be found at:
